

DIDSBURY PIONEER

VOL XXXI. No. 7.

DIDSBURY, ALBERTA, THURSDAY, FEBRUARY 15, 1934

\$2.00 per year 5 cents a copy.

Councillors All Re-elected

That the large majority of the ratepayers were satisfied with the work of the town council was shown at the election on Monday when all the retiring councillors were returned by a substantial majority.

There were 137 ballots polled of which 5 were spoiled and the results were as follows:-

W. D. Spence	150
J. E. Gooder	137
W. T. Pitt	114
J. A. McGhee	93
D. M. Sinclair	82

Bacon Hog Demonstration

The Department of Agriculture has arranged for lectures and demonstration on bacon hog production to be given at Didsbury on March 2nd, and at Carstairs on March 2nd.

It is an opportune time for farmers to familiarize themselves with what is needed for the best bacon production so as to get in a position to supply sufficient meat for the British market.

The quota arrangement for shipments of bacon to Great Britain was set at 250,000,000 lbs. and last year only 30,000,000 lbs. of salted bacon was available for export.

The object of these meetings is to induce farmers to produce the quality of hogs to supply this ready market.

The methods of feeding will be given by Department and University officials and the demonstration type of hog required for the production of the Wiltshire side will be given by a representative of the packers.

A series of meetings have already been held and in every instance have proved very popular.

Thanks.

We wish to thank the large number of electors of the town of Didsbury who showed the confidence they had in administration of the affairs of town during the past two years, by re-electing us to our seats on the council. We will endeavor to show that their confidence was not misplaced.

W. D. Spence,
J. E. Gooder,
W. T. Pitt

O.S.A. Experimental Union, 1934

The Olds School of Agriculture Experimental Union again has available for distribution to its members some excellent seeds and plants of field and garden crops. These are listed below. Each member may make from one to four selections.

Anyone interested may become a member of the Experimental Union by paying an annual membership fee of fifty cents. Members of the O.S.A. Alumni Association are eligible to make selections without fee.

POTATOES: (4 pound samples)
1 Early Ohio
2 Nette Gem
3 Bovee
4 Irish Cobbler

GRASSES: 5 Westerwold Rye Grass, 1 pound (a promising annual)
6 1/2 Lysa Western Rye Grass, 1 pound (an improved hay strain)
7 1/2 Grazer Western Rye Grass, 1 pound

8 "Fairway" Crested Grass, 1 pound (an improved seed of this new grass)

9 Collection of Alberta grown clovers and
10 Collection of home grown flower seeds

11 Collection of perennial flower seeds (1)

12 Caragana Seedlings (50)

13 Tartarian Honey-suckle seedlings (6)

14 Caragana seed. (2 oz.)

We have limited amounts of seed of a number of the leading varieties of wheat, oats, barley and peas, but nothing strikingly new. Members who are interested are asked to write.

Only a limited supply of each class of material is available so some substitution may be necessary. No orders will be accepted after April 15th.

Membership fee of fifty cents, must accompany selection. Express or postal charges amount to approximately fifty cents; this may be sent at the same time.

Report Forms may be filled in and returned to the O.S.A. at the end of the growing season.

WEEKLY SERMONETTE

"Too many conduct their lives on the Cafeteria plan, self service only."

Annual Meetings of Municipalities

The annual meeting of the municipal districts will be held on Saturday of this week. The meeting of the Mountain View District will be held at the Olds School of Agriculture, and Westerdale will hold their meeting at the Westerdale Community Hall, both meetings to be held at one o'clock.

Nominations for councillors will be held from 2 to 4 o'clock.

The retiring councillors for Mountain View are, Councillors J. A. Dodd, C. E. Jensen and Rev. Finn.

Westerdale's retiring councillors are, Councillors Allen, Hunsberger, C. G. Carlson and Alex Hogg.

Donations to Red Cross are Asked.

The Red Cross Society is always worthy of support and donations of cash and clothing are asked.

The local branch of the Red Cross Society has done its share in the immediate neighborhood towards alleviating distress, and now both funds and stocks of clothing, etc. are low. If the good work is to be carried on help is needed.

The Junior Red Cross Hospital for children at Calgary is also appealing for assistance. This hospital is doing great work for children and a number from this district have received great benefit from this institution. From lack of finance there are at present unable to care for all applicants and there is some danger that the institution may be closed if more financial aid is not forthcoming.

Any donation for the local society or for the Junior Red Cross will be thankfully received by the local secretary, Mr. W. A. Austin.

CARD OF THANKS

We wish to thank the friends in Didsbury for the many kindnesses shown our late father Mr. Moses Shantz, and for their sympathy during our bereavement.

C. B. Shantz and family.

We have a fresh supply of scratch pads now ready. Especially useful for school, store or telephone. 2 for 5 cents—Pioneer Office.

Obituary.

Mrs. T. WYMAN.

The death of Mrs. T. Wyman which occurred Sunday, February 11 will be deeply regretted by the people of the district. During her long residence in Didsbury she had endeared herself to a large number of friends and neighbors by her many kindnesses and cheerful manner and she will be greatly missed.

Margaret Emily Speer was born at Tara, Ont. on August 16th, 1871 and came west to Boissevain, Man. in 1889. In 1899 she married Wm. Thomas Wyman at Boissevain. They lived in Manitoba until 1910 when they came to Alberta and have lived in Didsbury since that time.

She is survived by her husband and son Ward, also Rennie, at home. She also leaves three sisters: Mrs. Levi Jones, Killarney, Man.; Mrs. George Richardson, Ponichy, Sask.; Mrs. Ed. Devens, Battleford, Sask.; and one brother, Edward Speer, of Kispiox, B.C.

The funeral service was held at the Knox United Church on Wednesday, February 14, with Rev. A. J. Mitchell in charge, and burial took place at the Didsbury cemetery.

MOSES E. SHANTZ.

Moses E. Shantz, 70 years of age, pioneer settler of the Didsbury district, died in a Calgary nursing home on Saturday, February 10.

He was born near Kitchener, Ont. and came to Didsbury in 1906, where he resided until 1933. Since then he had lived with his children.

Deceased is survived by his wife Magdalena; one daughter, Mrs. Ed. Weber, Calgary. Three sons: Lincoln, Kitchener, Ont.; Clayton, Rosedale, Alta.; Vernon, High River, Alta. Four brothers: Aaron, Samuel and Daniel, Kitchener, Ont. and Frank, Weynatchee, Wash. One sister, Mrs. M. Bowman, Kitchener, Ont.

Funeral services were held, Wednesday afternoon at the M.B.C. Church at Didsbury, at 3:30 p.m. Rev. H. Harder officiating. Burial will follow in the Didsbury cemetery.

Cards of Thanks

We take this opportunity of thanking our many neighbors and friends for their deeds of kindness and the sympathy shown us in our recent bereavement.

Tom Wyman and family.

For their kindness and sympathy during our great bereavement we wish to express our thanks to our many kind friends and neighbors. We especially wish to thank the matron and nurses of the Didsbury Hospital for their unfailing care and kindness.

C. M. Pratt and family.

High School Play

The following is the cast of the well known 3-act comedy, "The Importance of Being Earnest," which is being produced by the Didsbury High School on Wednesday evening, Feb. 21st, at the Opera House under the direction of Miss Irene Grant.

John Waring, J.P. Murray Kendrick
Algernon Moncrieff, Henry Peters
Rev. Canon Chasuble, Idris Jenkins
Merriman (the Butler), Ronald Lyons
Lane (the Manservant),

George Beerman
Lady Bracknell, Beatrice Kendrick
Hon. Gwendolyn Fairfax,

Dorothy Ranton
Cecily Cardew, Margaret Geiger
Miss Prism (the Governess),

Nelda Hunter
Act I—Algernon Moncrieff's Flat in
Hail Mass St.

Act II—The Garden at the Manor
House, Wootton.

Act III—The Drawing-Room at the
Manor House, Wootton.

Time—The Present.
Place—London, England.

An added attraction is the Didsbury Boys' Band.

Admission: Adults 25c, Children 10c.

Warren William as Ruthless Store Head "Employees Entrance"

"What Price Success?" might well be the title of "Employees Entrance," which carries the all-star cast consisting of Warren William, Loreta Young, Alice White, Wallace Ford and Alan Jenkins, and which First National is releasing at the Didsbury Opera House on Saturday next.

For the first time since the talkies, that bedevil of humanity, the throbbing, pulsing department store, with all its ramifications, and its thousands of employees, has been made the locale for a picture. In "Employees Entrance," Warren William plays the role of a ruthless, unscrupulous department store General Manager, whose dynamic, driving force for success, causes him to disregard every feeling for his fellow workers. He is a machine—too busy for any but the casual love affairs which he has with some of his pretty employees, whom he discards at his will.

According to advance reports from Hollywood, William's role in "Employees Entrance," is even greater than his wonderful performance in "The Montpierre," while Alice White, making her return to the screen after an absence of two years, delights as the department store vamp, who is the only employee not afraid of the boss.

Mature Age and Efficiency

An Eastern professor recently informed a gathering of Eastern educationists that no person over 40 years of age should be permitted to teach school. This recalls that other dictum of that famous doctor who said that every person over 65 should be quietly chloroformed. Both statements fail to convince because they are so palpably overstatements.

It is true, of course, that youth is becoming more insistent for recognition in the world of affairs, mainly because the problems of the times appear to call for that courage, initiative and energy which are compact of youth. The war robbed one generation of its birthright and opportunities. The depression appears to this generation to have repeated the process. That youth should be insistent against conditions which they did nothing to bring about, is natural in the circumstances and, possibly, salutary in the result. The Communist movement in Russia was energized by the youth of Russia. Mussolini recruited his Fascist army from the ranks of youth. Hitler has recruited German youth under the Nazi banner. These are manifestations of youth's protest against forces inimical, they believe, to youth's fulfillment.

The trouble is to set a hard and fast line where youth ends and age begins. If that were possible, it would be possible more accurately to estimate the significance of the two statements and their many imputations and implications. But there is no such line. It is possible to cite instances innumerable of men beyond forty who have proved great teachers of the young and men who have made their finest contributions to civilization after passing sixty-five. Had Arnold of Eton been forced to retire at 40, British education would have been that much poorer. Had Edison acknowledged his faculties exhausted at that age, much of his work for the advancement of science and enhancement of living, would have been left undone. Had forty seen the vitality of Einstein's mental powers recede to his zenith, there would not have been that competition among the great institutions of learning for his services which followed his expulsion from Germany. It was after he had passed the age of forty, that Henry Ford had his great idea and launched the enterprises coupled with his name. The tally of similar examples can be carried ad infinitum.

In the political field, President Roosevelt, far beyond the assigned "allotment" of forty, has tackled the vast problems of his country with a courage, vigor and zest which qualify him for a place with youth in these characteristics. Ramsay MacDonald, with equal energy and resource, did not hesitate, when the needs of his country called for drastic action, to scrap the ideals of a lifetime for ideas of more practical efficacy in the crisis of the hour. The youth of Russia, Germany and Italy accepted leadership of men beyond the "allotted span," because these men oriented the chaos of ideas torturing the youthful minds. Youth, apparently, constrains in terms of abstract qualities, cannot be measured by age—which suggests the well-known saying, "A man is as old as he feels."

There must be some reason for a prominent educationist to make so startling a statement to a gathering of educationists however. It is impossible to believe that, with such an audience, he spoke in jest, in an idle moment or without proper forethought. Perhaps his inspiration may be found in the work of the Spanish philosopher, Ortega y Gasset, who, in "The Modern Theme" has suggested that each generation is distinct in itself in that it differs in its reactions to ideas and environment from the generations preceding it. If this thesis be admitted, it would follow, of course, that one generation's viewpoint, being radically different from that of the one succeeding it, the former is out of touch with the youth of its own day and therefore not qualified to be its mentor. The more remote the generation from that of school age, the more out of touch it would be with the student's ideas and ideas.

Whatever the difference, custom has decreed that the one should be vested with the tutelage of the other. It is difficult to see how it could be otherwise. While there may be something in the contention that the generation from which the teacher be drawn should not be too remote from that furnishing the school population of today, it must not be forgotten that the knowledge gleaned from experience of life and living acquired by the older generation must be of inestimable value in preparing the young for their responsibilities.

After all, no new social structure is created with each new generation. They may improve, or remodel, and the social structure characteristic of Western civilization is the cumulative result of such improvements. Something constant is imparted from generation to generation however. So long as this condition exists, the accumulated experience of the past must retain its value and finding expression through the process of education, in school or in the home, be passed on to those preparing themselves for the duties and responsibilities of full citizenship.

Youth demands recognition and should be recognized. But an intelligent definition of youth, other than that of mere years, is necessary to complete acceptance of the statement that no person over forty should be entrusted with the task of teaching youth.

Science gradually is extending the period described by life insurance companies as "life expectancy." Why, then, if chloroform is the best poison when one has reached sixty-five?

A wheel in the great clock of the former royal palace at Potsdam, Germany, revolves only once in a period of 400 years. There's a clock to hold a check-watcher.

Canada exported 4,062,000 pounds of beef to Great Britain up to October 30 this year, an increase of 3,000,000 pounds over the corresponding ten months of last year.

Shortness of Breath Weak, Sinking Feelings

If going up stairs, climbing ladders, walking too far, if the least exertion causes you to stop to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

What you should do is take a course of Milburn's H. & N. Pills. These tone up and strengthen the vital organs so as to prevent any harmful attacks of disease.

Ask your druggist for Milburn's H. & N. Pills.

Hold Strong Congress

Romanians, Or World Plan Establishment Of Stable Community

"Gipsies of the world unite!" is the motto of the General Association of Romanians which held a strange congress in Bucharest.

The wave of fanatic nationalism which is sweeping these parts of Europe has also affected the nomads who want to give up their free and easy life and organize themselves into a race-conscious and stable community. Thus the last citadel of romanticism and idealism in the absolute sense is about to be ruined. It will be replaced, in all probability by political demagoguery.

Hundreds of Romanians in picturesque dresses came to the congress. Looking in from all corners of the country. The meeting took place in the open air, in the gipsy quarter of Bucharest which consists of innumerable mud huts built around a pestilential lake on the outskirts of the city. A regiment of gendarmes took care that the participants behaved themselves.

The congress was held in perfect order. The gipsies seemed convinced that they were entering upon a new era of "national dignity," as was announced by their leader, George A. Lazarica, an exceedingly good impersonator of Hitler both as regards aspect and oratory. Following are some of his most galvanizing phrases:

"We are a great and noble race. We don't want to be ridiculed and treated as the dogs of society. Let us form a strong nucleus in Roumania, and all the Romanians of the world will be inspired by us and become proud of their race."

WORKED ONLY ONE WEEK IN TWO

Sciatica Keep Him At Home

It is the wife who sends us this information about her husband's troubles. She writes: "For some time past my husband has been unable to work only one week in two, on account of sciatica. He suffered so much from it that he could scarcely get out of bed. We tried many things, but without result. Then we saw in the papers an account of the good results that had been obtained from Kruschen Salts, and we decided to give them a trial. For twelve months past, my husband has been taking his 'little dose' of Kruschen every morning. Now, he has no more trouble with the sciatica, and is working regularly." (Mrs. M.)

Doctors estimate that one-half of civilized humanity suffers from partial constipation. This condition results in an unsuspected residue of waste matter, which poisons the blood and produces such troubles as many of the mystery aches and pains from which people suffer. Kruschen keeps the organs of elimination in perfect trim, so that every particle of poisonous waste material is expelled gently, regularly and completely.

Expect Increase In Live Cattle Shipments

Canadian Officials Anticipate Better Market In United Kingdom

Officials of the agricultural department look forward to a good year in the export trade of live cattle from Canada to the United Kingdom, despite the quota which will limit shipments for the first three months. The limit is slightly under 8,000 head, equal to what was shipped last year during the same three months.

The United Kingdom had a shortage of red crops last season. The result was that many cattle raisers without sufficient fodder sold their cattle for slaughter when only partially finished. The shortage of feed in Canada also caused many unfinished cattle in this country to be shipped to Great Britain. The result had a depressing effect on the market which was injurious to both British and Canadian cattle raisers.

Rule For Egg Shipments

No Canadian eggs are allowed to be exported out of Canada unless they are packed in Canadian Standard cases, each case contains 30 dozen eggs in new dry export filters and flats, and with new kiln dried paper-covered, exclusive of top and bottom, or with any other pack, or cushion approved by the Dominion Minister of Agriculture.

How to Stop a Cold Quick as You Caught It

Take 2 Aspirin Tablets.

Drink full glass of water.
Repeat treatment in 2 hours.

If throat is sore, gargle with dissolve 4 Aspirin Tablets in a half glass of water and gargle according to directions in box.

Almost Instant Relief in This Way

The simple method pictured above is the way doctors throughout the world now treat colds.

It is recognized as the QUICK-EST, safest, surest way to treat a cold. For you get Aspirin Tablets almost as fast as you caught it.

Ask your doctor about this. And when you buy, see that you get Aspirin Tablets. Aspirin.

Does Not Harm the Heart

is the trademark of The Bayer Company, Limited, and the name Bayer in the form of a cross is on each tablet. They dissolve almost instantly. And this work almost instantly when you take them. And for a single Aspirin Tablet, dissolve in completely, they leave no irritating particles. Get a box of 12 Tablets or bottle of 24 or 100-tablet drugstore.

Egg-Grading Regulations

New Schedule Came Into Effect The First Of January

The riddle of why does a chicken cross the road is not a white rooster but a great many people that the new federal egg-grading regulations which came into force on January 1. To those who take time out to study the act, however, it presents few difficulties. The terms "fresh eggs," "fresh extra" and "fresh firsts" are to be discontinued. In future fresh eggs will be designated as "A," large; "A," medium, and "A," pullets. Eggs of more than 22 ounces to the dozen will be in the large category; the medium grade will weigh between 18 and 22 ounces, and pullets' eggs will weigh up to 18 ounces. The regulations put storage eggs in "B" grade, but patrons of Central market need not be concerned about that section of the act, because a city-by-law prohibits the vending of storage eggs on the public square.

Alfred Smees, manager of Central market, drew attention to the fact that inferior quality was a main factor in the new grading schedule. There will be none to dispute that, except for throwing, a fresh little egg is much to be preferred to a big bad one. Superficial inspection of the exterior isn't helpful to egg shoppers, either. The customer must rely on the honesty of the purveyor, and the government, in its wisdom, gives egg dealers an especial incentive to be honest by providing stiff penalties for those who are not. For the purpose of the act, a fresh egg is one in which the air cell space does not exceed one-quarter of an inch. There is a continuous process of contraction within the shell and when candling reveals an egg to have more than this amount of air cell space, it is taken as prima facie evidence that the product is making ready to grow a beard.

Egg dealers with an established clientele will not be annoyed about the new regulations. They cannot afford to sell eggs of inferior grade, and, for the protection of their business, would be careful to keep quality up even in the absence of official regulations. Hamilton, Ont., Spectator.

Basis Of Egg Weight

The notion of egg shippers and egg packers is called by the Dominion Department of Agriculture to the fact that in the revised standard egg grades, individual eggs serve as the basis of weight rather than dozen of case lots. In the instance of Grade "A" large, for example, each individual egg in the pack is required to weigh two ounces and over. Similarly in the medium pack each individual egg should weigh at the rate of 22 ounces and under 24 in the dozen.

Time heals all wounds. But our time on earth is limited. That's the trouble.

Little Investors Save Billions

National Savings Movement In England Has Proved Successful

British thrift is increasingly becoming a national virtue, as indicated by figures given by Walter Runciman, president of the London Board of Trade, in connection with the national savings movement.

"The total wealth of small investors in various types of investment at a conservative estimate," he said, "reaches the stupendous figure of £2,832,250,000 (approximately \$14,166,250,000). What with this national savings movement and all that pertains to it, there is very little doubt that we need have no fear as to this country being swept away on a wave of Bolshevism."

Lord Mottistone, chairman of the movement, stated that the increase in the amount standing to the credit of depositors in the post office and trustee savings banks and to investors in national savings certificates and in government stocks purchased through the savings banks during the last three years, in spite of the financial crisis, was more than 3½ times the increase during the previous three years.

Just About Equal

The Rocky Mountains and the maritimes are just about equal in the mind of Almon Humphrey Madden. Forced to a low altitude by rain, sheet, strong headwinds and ice forming on the wings while flying from New Glasgow to Halifax, early in January, Pilot Madden said it was the toughest flight in his experience—nearly corresponding to a hazardous crossing of the Rocky Mountains he had once made.

LYDIA E. PINKHAM'S TABLETS FOR WOMEN

They relieve and prevent periodic pain and associated disorders. No narcotics. Not just a pain killer but a modern medicine which acts upon the CAUSE of your trouble. Persistent use brings permanent relief. Sold by all druggists.

W. N. U. 2029

Experiments Being Carried Out By United States Railways With Aerodynamic Trains

The experiments being conducted by United States railways with aerodynamic types of trains which will flush over the rails between New York and Los Angeles in 50 hours at an average speed of 85 miles an hour are being carefully watched by Canadian railway officials.

While opinions as to the feasibility of the new trains operating in Canada are divided, Canadian motive engineers are eagerly awaiting the results of the experiments although they point out that any development in this direction will have to wait for better times.

From the Canadian viewpoint a serious problem is presented in the all-metal construction of the trains which motive men say will likely prove to be a conductor of the bitter Canadian cold. Frost works its way through steel structures and unless backed by heavy insulation the all-steel cars would be impractical in Canada where steel heavy insulation and wood are utilized in the making of railway coaches.

Engineers viewing the experiments in a favorable light point out the new type of trains will permit lower operating costs in addition to increased speed, comfort and luxury.

On the other hand some motive men take the view the large increase in speed will mean a decrease in safety. At present some Canadian trains average between 50 and 55 miles an hour but to achieve this speed they have to travel at 80 miles an hour on occasions. The new trains to maintain an average of 85 miles an hour would have to touch 110 miles per hour or more a heavy burden on the present type of road-bed which is expected to be used.

The road-bed is one of the contentious points of the contrasting points of view. Opponents say the present road-bed would not be able to stand the strain of the high speed and a special rigid type would be needed. The cost of replacement being tremendous.

To give weight to their argument they cite the case of the "Flying Hamburger" which developed a speed of 160 miles an hour in Germany. The company which introduced the stream-line car is now completing a special track.

High costs in initial building of the trains through the use of duralumin and stainless steel in addition to the building up of other trains to permit the "rocket" train to clear track are other reasons against the new trains. Low operating costs, possible future reduction in material and passenger appeal might possibly offset those facts.

However, some of the engineers are of the opinion that if up and down beds were constructed and sufficient safety achieved, there was no reason why the experiments should not be successful.

In any event they declare if the public desire the new types of trains, the way will be to see them speeding across continents in two days and two nights.

Good Sugar Beet Yield

Satisfactory Crop Grown On Northern Alberta Irrigated Land

Lethbridge Northern Irrigation District heads all other Southern Alberta sections in 1933 sugar beet yields. Instructions are that this district will show an average yield of better than 11 tons per acre. This is far ahead of the top with almost 12 tons, which from Springs is second with 11.25 tons. These tonnage are far ahead of the Fisher-Hornwell district which, up to this year, has always held the high yield record.

A Valuable Manuscript

Francis Scott Key's original manuscript of "The Star Spangled Banner" was sold at public auction recently for \$25,000. The buyer was Dr. A. S. W. Rosenbach, noted bibliophile. The manuscript is one of the ordinary manuscript of the ink known with age.

W. N. I. 2479

One Of Strangest Lakes

Possible To Walk On Body Of Pith In Trinidad

Lake La Brea in Trinidad is one of the strangest lakes in the world. In legend there are lakes with no beds, secret holes into which rivers flow without mixing waters and lakes that vanish in a night and reappear as quickly. But Lake La Brea is remarkable in that it is possible to walk upon it.

It is a lake of pitch occupying the crater of an old volcano. Vast quantities of bitumen are exported every year for use in road-making, yet the lake shows no signs of drying up. Fresh deposits are continually forming on the bed of the lake at a depth of about 120 feet.

It is considered to be one of the hottest places in the world, yet the bitumen forming the lake is sufficiently hard to allow of driving a horse and cart across it.

The lake has an area of some hundred acres and is estimated to contain more than nine million tons of bitumen.

Seed, Wheat For Russia

Sixteen Thousand Bushels Of Grain Wheat Goes To Siberia

Sixteen thousand bushels of seed wheat, chiefly Canada, will leave Saskatchewan for Siberia tonight by the Soviet government for the districts needing an early wheat, according to information received from Neil Stewart, Dunblane, president of the Saskatchewan Registered Seed Growers' Association. Farmers selling the seed have received a satisfactory premium over commercial prices.

Mr. Stewart said the association could have handled a larger order had field inspected seed been available.

Grain which is now stored in the Registered Seed elevator at Moose Jaw has been cleaned there and will go for February delivery at New York.

Some of the wheat was grown in Alberta.

Retaining Winter Moisture

Wheat Yield On Such Land Shows Big Increase

The Dominion Experimental Station at Swift Current has been experimenting with yields of wheat on land where winter moisture has been prevented from running off, and has found an increase of 42 per cent. in some cases where the water was retained, compared with similarly treated land lying the same, and in the same state of cultivation where the water was allowed to run off.

A common grower of wheat in a yield as high as 117,000 seeds.

Scheme For Furtherance Of World Peace Is Advanced By A Toronto Resident

Proving Huge Success

Spelling Clock In Paris Brings In Huge Revenue

The recently installed "spelling clock" of the Paris telephone system is proving a huge success. The Ministry of Posts has announced. Every day it tells the time to an average of eleven thousand inquiries, incidentally bringing in a revenue of four million francs yearly, half of which goes to the State.

This robot clock can tell the time to thirty persons simultaneously. On Sundays and holidays the average drops to 6,000 an hour. The peak hour is around 8 in the morning when hundreds of workers call for the exact time.

The mechanism of this clock is highly complicated, though for the subscriber it is a simple operation of dialing "Odeon 84-00," states the New York Times Correspondent.

Each strip of film, equipped with sound tracks, one each for the hour, minute and second, are used. The strips are wound about a drum, which is driven by an electric motor controlled by a pendulum clock. A light, falling on the paper-wound drum, is reflected to a photoelectric cell which converts the varying bright and dark lines into electric impulses. The cell is connected with amplifiers and three loudspeakers, one of which announces the hour, another the minute and the third the second, always in the proper order.

When no one is calling the clock does not "talk." Everything is turned off until a telephone call comes, when the mechanism starts instantly to work.

Bricks In Color

Multi-Colored Rough Texture Bricks Coming Into Use

Recent developments tend toward the use of multi-colored rough texture bricks, with coloring that is more pleasing to the eye and gives the appearance of charming designs without the heaviness that was so obvious in the old methods of construction. Such colors as Autumn Tint, Cherry Red, Emerald, Dark Strawberry, Orange, Silver Grey and Golden Grey will be found among the new bricks. The same applies to all where at least ten different colors are now available.

A reported shortage in oak trees may be the result of their use for the manufacture of antique furniture.

A scheme for the furtherance of world peace has been advanced by a Toronto author, W. K. Dyer. The proposal, still in the early stages, is to develop a flag with the word "peace" emblazoned in deep blue letters on a white oval representing the universe, and placed on a sky blue background. The finished product would be known as the "World Peace Flag."

It is intended by the author to have the word translated into various languages and send prints to their respective countries. Already the word has been placed on ten different prints, English covering the British Empire and the United States, German, Russian, Greek, French, Italian, Chinese, Hebrew and Japanese, the international language.

When the proposal has become concrete it is intended by the designer to have the peace flag submitted to the League of Nations for official recognition, and it has been stated the League of Nations society in Canada is willing to consider the scheme when it is placed in their hands for discussion before submission to Geneva.

However Mr. Dyer does not believe his scheme has advanced to the stage for such action, and is endeavouring to have the word placed on a flag in as many languages as possible before taking a step in that direction.

The finale of the scheme, after it has gained recognition, is to place the flags in the school rooms of the world so the meaning of "peace" may be impressed into the minds of future generations. Accompanying the flag is a five verse song, termed "The Children's Song of Peace."

When the scheme would gain maturity Mr. Dyer has not stated. But he believes the next few months would see the proposal advanced much further.

Appeals To King George

Private Wanted Help To Get Out Of Army

Private Sam Lee, of the 2nd Battalion of the Northamptonshire Regiment, was wanted to the King, asking him to get out of it but he did not know what steps to take. He did not relish the obvious method of approaching his commanding officer.

Then a bright idea dawned on him. He would write to the King, asking him to grant his request, and when the army officials complained, he would send a copy of the letter to the King, asking him to grant his request. He sent a copy of the letter to the King, asking him to grant his request. He sent a copy of the letter to the King, asking him to grant his request.

It wasn't long till Private Sam Lee was on his way to the King, asking him to grant his request. He sent a copy of the letter to the King, asking him to grant his request. He sent a copy of the letter to the King, asking him to grant his request.

His letter to the King reached its destination, but His Majesty was so busy that he did not have time to read it. He sent a copy of the letter to the King, asking him to grant his request. He sent a copy of the letter to the King, asking him to grant his request.

Language Of The Bees

Bees Employ Kind Of Fan And Dumb Alphabet

These have a language of their own, according to Mrs. L. Bingham, of Huddersfield. She has been studying the language of bees. She has been studying the language of bees. She has been studying the language of bees. She has been studying the language of bees.

Attractive Passengers "Main" themselves a poor sailor, I believe." Imposing Diner: "Indeed he is, but he is a rich produce merchant."

CARNARVON AT ENTRANCE TO TUTANKHAMUN TOMB

The mysterious death of Dr. Arthur E. P. E. Weigall, noted author and Egyptologist in London, recalls the series of misfortunes that overtook more than a decade ago. Superstitious Britons say the savant's death is proof that the curse, placed by the ancient Pharaoh on robbers of his tomb, is still working. While excavations on the tomb was still in progress, Lord Carnarvon, financial backer of the expedition, died mysteriously. Soon after Howard Carter, leader of the expedition was stricken, but recovered. The Hon. Reginald Wendell Carnarvon's brother-in-law, died at the age of 29 and Lady Carnarvon was afflicted with a mysterious ailment but recovered. Colonel Arthur Herbert, Carnarvon's half-brother, died, and many others whose connection with the gold man was remote, also suffered through the strange spell.

J. E. Gauder - Editor & Manager

"Kritiks' Korner."

Criticism of any public body is to
be expected and if fair may be de-
sirable, but rank insinuations are to
be deplored. During the election one
party who is not even a taxpayer
was very busy scattering propaganda
and making statements which were
to say the least untrue. Apparently
from the results of the election
his statements were generally ac-
cepted for what they were worth.

We notice that further improve-
ments are being made at Mac's
Hardware Store. Is not this good
evidence that business is improving?

There is a lot of old junk laying
around that should be picked up
now while the snow is off.

This fine weather furnishes a good
opportunity for building and mak-
ing repairs.

Have you missed it? The toilet
that used to stand at the back of
the Bank of Montreal and just across
the line from its entrance to the
E. V. Church. When it was torn
there all these years is more
than we can understand.

The cross walks have been looked
after better of late, however, we
would like to point out again, that
they should be raised a few inches
above the level of the street so that
the water won't stand on them.

The E. V. Church property looks
better since the improvements have
been made on the parsonage. We
hope that either a new building will
soon be erected on the church lot or
that the cellar will be filled up and
the lot graded off.

The news that we are to have new
fire fighting equipment is good news.
What ever system is adopted, it
should furnish ample protection for
every resident of the town.

Agricultural Notes.

Egg and Poultry Exports

A few years ago Alberta was a
heavy importer of eggs. During
the intervening period the situation
has been reversed, and the province
is now an exporting basis, the
import of eggs being almost negli-
gible. In 1933 the total egg export
from the province was 39,325 cases,
or about 87 carloads, while the im-
ports were but 1,500 cases, all from
B.C. Of the total exports, about
36,000 cases were in the first three
grades, and about 20,000 cases
were either extras or fresh birds.
The export of poultry totalled 1-
262,500 lbs. of which over a million
lbs. was turkey meat.

Horse and Cattle Shipments

Nearly 125 million lbs. of beef on
the hoof were exported from Alberta
during 1933, as compared with
about 114 lbs. in 1932. This esti-
mate is based on the export of 124-
428 head of cattle, as compared
with 96,701 head in 1932. The

total export of horses from the pro-
vince in 1933 16,182 head, compared
with 14,346 head in 1932. The fig-
ures are preliminary, subject to
to some revision when total returns
have been received by the provincial
department of agriculture.

Alberta Dairy Convention

The entire marketing problem as
it affects Alberta butter will be dis-
cussed at the annual convention of
Alberta dairymen to be held at Ed-
monton on February 13th and 14th.
Marketing will undoubtedly have a
big place on the program. Important
visitors to the convention, who
will give addresses on vital subjects,
will be J. F. Singleton, Dairy Com-
missioner of Canada, Dr. Hoad,
Chief of the Division of Dairy re-
search at Ottawa, A. C. Fraser,
secretary of the national Dairy
Council, J. S. Burgess, Head of the
division in charge of commercial
grading of dairy products, and others.
Mr. Fraser, it is understood,
will have something to say regard-
ing the operations of the British
Agricultural Marketing Acts.

Prices Better

Prices for butterfat and for hogs
have reached during the last week
the highest levels of the past three
seasons. Prices for butterfat during
the second week in January were
three cents a lb. higher than those
prevailing at the same time last year,
and one cent a lb. higher than those
of two years ago. Hog prices,
reaching in Edmonton to a point of
\$7.75 for bacon, were the highest
in three seasons.

Burnside Notes.

Mr. Jake Dyck of Didsbury spent
a few days at his home, here, last
week.

Mrs. C. Ehret and Miss Alberta
Metz were Friday dinner guests at
the home of Misses S. Zook and S.
Dyck in Sunnyslope.

Miss Wilma Liesemer is visiting
friends in Revelstoke, B.C.

Mr. Cecil Cipperley has purchased
the Harry Pearson farm. We're
waiting to see what's going to take
place next, Cecil.

Miss Esther Schumacher spent
the week end with Miss Marjorie
Pross.

Don't forget Mr. Jim Tate's auc-
tion sale on Feb. 27th.

Mr. Chas. H. Mardon returned
home Saturday from Calgary, where
he attended the trustees' convention.

Mr. and Mrs. Otto Bittner visit-
ed Mr. and Mrs. H. Campbell, on
Sunday.

Mr. and Mrs. George Metzger,
Dave and Miss Jean Hunter, spent
Sunday with Mr. and Mrs. Don
Gracie at Westwardho.

Mr. Fred Doll spent Sunday even-
ing at the McLean home.

Mr. R. Shields returned from the
southern city driving a new Rio
truck.

Mr. Howard Pross spent a few days
with friends at Wimbome.

Sunday visitors at the home of
Mr. and Mrs. B. Pross were, Misses
Sadie and Gerrie McLean, Mr. and
Mrs. B. Shells, Messrs. Gus Bittner,
Fred Doll and Robert Eckel.

Don't forget the big concert and
lance at Lone Pine Hall this Friday
Feb. 16. Admission, Adults 25c
Children under 16 free. Dance
admission 25c. Everybody come
and have a good time.

Messrs. Bob and James McCulloch
were Calgary visitors on Friday
last.

Don't forget the Lone Pine W. I.
Concert and dance this Friday eve-
ning Feb. 16th.

Mr. and Mrs. W. Topley of Cal-
gary spent Sunday with Mr. and
Mrs. John Topley here.

Mr. and Mrs. N. Eckel, came up
from Calgary and spent a few days
at their home here.

Mr. Fred Metz spent Sunday
with Mr. and Mrs. Bert Pross. We
wonder why he takes his little dog
along.

WEEKLY JOKE

A Chinaman was asked if there
were any good doctors in China.
"Good doctors," he exclaimed.
"China have best doctors in the
world. Hung Chang, one good doc-
tor, he great, save life to me."
"You don't say so? how was that?"
"Ma velly bad, me callee Dr. Han
Kon. Give some medicine, get
velly ill. Me callee Dr. San
Sing, give more medicine, me glow
worse, go die. Bimely callee Dr.
Hung Chang. He got no time; no
come, save life."

Geo. Young, Returning Officer.

Here and There

The Canadian Pacific Railway
supply farm, Strathmore, Alta.,
had the best Holstein cow in the
four-year-old or over (not in
milk) class at the Royal Winter
Fair recently held at Toronto.

Snuff Winter Sports Carnival
will be held from January 21 to
February 4. It is announced.
The carnival will be followed
by a series of sports week-ends,
each being devoted to one par-
ticular type of sport.

The problem of truck-rail com-
petition was declared a national
one by S. Hayes, M.A., in a re-
cent address before the Engi-
neering Institute. He saw regula-
tion and restriction in areas
where the truck does not be-
long as the only solutions.

Christmas festivities this year
will be enlivened by Japanese
oranges of which 3,000 boxes
arrived at Victoria recently
aboard the Empress of Canada,
for distribution to a number of
Canadian cities. Some boxes were
left at Victoria and the fruit
will doubtless feature in the
Empress Hotel Yuletide celebra-
tions.

Since October 1, 1929, a total
of 101,765 people have been set-
tled on Canadian farms or given
farm employment under the an-
spices of the Dominion Depart-
ment of Immigration and the
five great transcontinental rail-
way companies, according to a
report issued by the Department
of Immigration, 92.5% of these
people were settled without fi-
nancial assistance.

Expression of confidence in a
brighter business outlook in
Canada, coupled with definite
improvement in conditions
throughout the Dominion, was
made recently by H. J. Hun-
phrey, general manager, Cana-
dian Pacific Railway, eastern
line, in an interview during his
trip of inspection to the Brit-
tains prior to the opening of
the winter navigation season.

Five ports hitherto not touched
at by world cruises - Penang,
Straits Settlements, Semarang,
Java, Boreleng and Padang Bay,
Bali, and Zamboua in the
Zulu Archipelago - have been
added to the 1934 Itinerary of
the Canadian Pacific liner Em-
press of Britain, sailing from
New York January 4. The cruise
will cover 122 days and 29,916
miles and will return to New
York May 14.

Special low fares with gener-
ous time limits for the return
trip will be available on Cana-
dian railroads for the Christ-
mas and New Year holiday pe-
riods. It is announced by C. P.
Riddell, chairman, Canadian
Passenger Association. These
low rate tickets will be available
between all stations in Canada
and also between points in Canada
and certain United States con-
nections.

WORLD HAPPENINGS BRIEFLY TOLD

The Turkish cabinet has definitely approved the new five-year plan to industrialize, formerly agricultural Turkey.

The discovery of two new, small planets between Mars and Jupiter was announced by the Algiers Observatory.

Dr. Lucien Gilchrist, professor of physics at the University of Toronto was elected president of the Royal Astronomical Society of Canada at the society's annual meeting.

Two carloads of elk have been shipped from Wainwright, Alberta, to Inverness, Ont. This follows a similar shipment nine months ago to the Ontario Department of Game and Fisheries.

Efforts will be made by the agricultural committee of the Ontario legislature to bring about an inquiry by the Dominion and provincial governments into the operation of single crops in Canada.

A new world's land plane speed record for a 1,000-kilometre (approximately 622 miles) course was set by the French pilot, M. M. Massicot, who flew it in two hours, 47 minutes, 31 seconds.

Canada was officially invited to participate in the next Olympic games at Berlin. The invitation was received by James G. Merrick, of Toronto, member of the International Olympic Committee for presentation to the Canadian Olympic Committee.

The University of Montreal which has been in financial difficulties for several years, is the recipient of a gift of \$250,000 from P. V. Rouleau, Parisian manufacturer. The sum is to be devoted chiefly to the medical laboratories of the university.

The winter of 1932-33 is considered by aviation companies to be the worst they have had since planes started operating in the north. According to Pilot Walter Gilchrist, Canadian Airways, through many causes, planes had to stay idle when there was plenty of work for them to do.

The Wheat Pact

France Reported To Be Doing Her Part To Live Up To Agreement

France is doing her part to live up to the credit and letter of the wheat agreement, according to information reaching Hon. M. A. Macpherson, who represented the justice portfolio at the wheat supply conference in London last summer.

Summaries of the literature brought over France have reached M. Macpherson. They include extremely large potatoes, which are the greater use of wheat and the finding of wheat sowing technique and methods, which stress the importance of feeding wheat to livestock and poultry. Farmers are advised to mix one quarter wheat with each lot of corn in their diet.

Prince Of Wales Sells Land

Proceeds To Be Used For Ship Charities

Sale of 14 acres in Richmond, southwest London, belonging to the Prince of Wales, Duke of Cornwall and Devon, was announced in London. The proceeds to be donated to ship charities. The sale includes the famous creek, which is the largest of its kind, and the garden, which is the largest of its kind.

The Duke's 14 acres of land, which he has been selling since 1914, is the largest of its kind. The Duke's 14 acres of land, which he has been selling since 1914, is the largest of its kind.

Important Medical Discovery

Alan Paul L. Sherman, B.A., a native of the United States, has been elected by the medical world for his major part in developing palmar-plexus, a method of quickly reviving a person from an unconscious state, caused by an overdose of an anesthetic. The discovery is of an immense importance.

Magistrate: "So you and you were not fighting again?" "Prisoner: "No, sir, we were not."

Highway On Pacific Coast

Starting At Fairbanks Would End At Buenos Aires

Largest single highway project ever undertaken, the 12,000-mile International-Pacific Highway, is projected to begin at Fairbanks, Alaska, follow down the Pacific Coast to Valparaiso, and terminate at Buenos Aires.

Some sections already are completed. Others are possible. In Central America, most of the route has been surveyed.

From Mexico southward the route would be the same as the long-disputed Inter-American Highway. President Roosevelt has offered to finance the survey from Panama to Santiago, Chile, if the governments concerned agree, at a cost of probably \$500,000.

The tremendous undertaking of a Pacific road was conceived four years ago in Southern California. Since then, such men as Harry Chandler, publisher, western publisher, and Pike Anderson of the National Automobile Chamber of Commerce have been identified with the plan. The Automobile club of Southern California has successfully secured the route as far south as El Salvador, having sent two motor caravans from Los Angeles.

Sponsors of the road do not urge an overnight spurge of primary highway construction from here to Cape Horn. But they have obtained pledges that the participating nations will lay out their road-building programs hereafter with a view to completing segments of the route as soon as possible.

Approximately 25 per cent. of the International Pacific Highway is an accomplished fact. The route from Hazelton, British Columbia, down the coast to San Diego and thence eastward to Nogales on the Mexican border, is a continuous stretch of 5,000 miles of primary highway.

Recipes For This Week

(By Betty Barclay)

TUNING CROQUETTES

- 1 large yellow turnip
- 2 potatoes
- 2 egg yolks
- 1 teaspoon sugar
- Salt and pepper
- Crumbs and egg

Wash, peel and quarter the turnip. Cook until tender in boiling salted water to which has been added one teaspoon sugar. Press through a sieve. Peel and cook the potatoes separately. Mash until smooth. Combine three quarters of a cup of the cooked turnip with one-half cup of the mashed potatoes. Add the two slightly beaten egg yolks. Add Parmesan, salt and pepper. Tap in crumbs again. Fry in deep fat. Drain on brown paper.

YEAR-ROUND SALAD

- 1 package lemon or lime-flavored gelatin
- 1 pint boiling water
- 1 tablespoon vinegar
- 1 teaspoon salt
- 1 cup celery, finely cut
- 1 cucumber, finely cut
- 1 pineapple, finely cut
- 1 tablespoon green pepper, finely chopped
- 2 cup cabbage, finely shredded

Dissolve gelatin in boiling water. Let cool and add salt. When slightly thickened, fold in remaining ingredients. Turn into individual molds. Chill until firm. Garnish with mayonnaise. Serves 12.

Employing Hand Labor

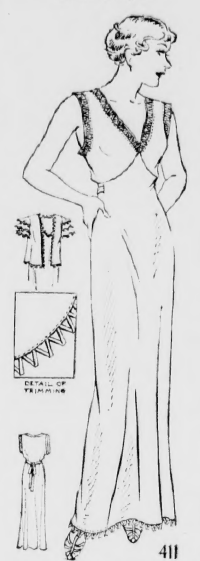

Employers in Argentina Try To Give Work To Idle

Following the lead of a cigarette manufacturer who has just removed from his factory all cigarette-making machines in order to give work to several hundred unemployed men and women, working-men's leaders in Buenos Aires, Argentina, are trying to encourage the same. They are starting campaigns to induce plant owners in many other industries to substitute human for machine labor and thus give employment to thousands still idle.

The man doesn't live who feeds at ease in a room where two women are whispering.

By Ruth Rogers

NIIGHT GOWN AND BED JACKET ENSEMBLE—A NEW AND DIFFERENT FANTASY PARIS SENSUOUS

It's loveliness itself. The nightgown will wrap you in sheath-like slimmest. The slash slit down the front, holding the gown closely to the figure. It fits in such effect at the back. It has the loveliness of "V" neckline and deep armholes.

The simple straight little jacket favours tripled rounded sleeves. The original was pale blue crepe satin. A craft touch in strips of silk fabric, stamped its French origin. It's easy to do. The pattern envelope explains everything about this interesting craft touch in detail.

Choose now! Make this exquisitely beautiful ensemble for just the cost of \$14.95. Size 36-44 is designed in sizes 36, 38, 40, 42 and 44.

Size 36 requires 1 1/2 yards 20-inch and 10 1/2 yards trimming. Price of pattern 20 cents at stamps or cost (not preferred). Whap can cut.

How To Order Patterns

Store Has "Gratis Day"

Customers in Medan, Dutch East Indies, Read Benefit

Customers of two department stores in Medan, Dutch East Indies, may get a cash refund for goods purchased on a certain day, which is chosen by lot. Under the new plan all purchases made during the month are recorded on a cash slip, a copy of which is given to the customer. On the first day of the following month, slips representing each day are deposited in a container, from which one is drawn representing the "gratis day" and those who made purchases on that day are given their money back.

Even Rhinos Are Cheaper

Lake potatoes and tomatoes, rhinoceroses are cheaper. Frank Buck, who brings 'em back alive, has offered to sell the St. Louis zoo a young rhino for \$100,000. About 10 years ago the price was \$200,000 for similar rhinos.

Marrels of the Human Eye

By F. M. CROWE, Optometrist-Optician, Calgary

NO. 3.—MYOPIA, OR "SHORT-SIGHTEDNESS"

As explained in Article No. 4, to obtain normal vision the depth of the eyeball and the curvature of the lens and Cornea should be in exact relation to each other.

Should the depth be too great or the lens or Cornea too convex, then the focal point of the image will be in the Vitreous Humor in front of the Retina. The rays from the image focused at, after focusing will cross and proceed to the Retina forming an enlarged but blurred image. This is the Myopic condition, and unlike Hyperopia, nature does not provide any means of overcoming it.

The average Myope (Myopic person) has no trouble at the reading distance. His trouble being poor distant vision. It is significant that Myopic persons seldom indulge in outdoor sports or recreation but turn to books and study. The Germans as a nation are typical of this, especially among the "intellectuals" which may possibly account for their advancement in science. It is estimated that of all the refractive errors of the eye only six per cent. are Myopia.

Myopia may be congenital or acquired. It may be acquired by excessive close work especially during childhood, before the eyeball has reached its maturity. True Myopia will never improve all that can be hoped for is that by wearing

proper glasses early enough it will not increase and get into the "progressive" type with its resultant evils. It should always be corrected as soon as discovered, if for no other reason, to prevent further increase of the trouble. Excessive close work, especially if done under improper lighting conditions, is the principal cause of producing and increasing Myopia. Such people are usually intolerant of strong light. Being a "weak eye" such symptoms as easily tired and watery eyes often accompany this condition. Frowning or knitting the brows to obtain better vision is very characteristic of Myopia.

As I said in explaining Hyperopia that it is the commonest cause of a child's eye turning in (crossed) so Myopia is the usual cause of the eye turning out. The great danger of allowing even a small amount of Myopia to go uncorrected is the alack of probability that it will grow worse and become a progressive condition and from that it is only a step to the "malignant" type when the ruin of the Ocular system is usually a matter of time. If a normal depth eyeball of one inch were elongated, as in Myopia, one twenty-fifth of an inch, the vision would decrease from one hundred per cent. to about fifteen per cent. (To Be Continued)

To Identify Members

Federation Of Business Women's Clubs Seeks Universal Emblem

Linked together with the object of forming a chain of friendly relations and mutual understanding, the International Federation of Business and Professional Women, with national federations or units in 21 countries, is now seeking a universal emblem which will identify members to each other in any part of the world. A competition for a design for the emblem is announced at Geneva, federation headquarters, by Miss Dorothy Hensler, of Montreal, federation director.

For the best design a prize of \$100 is offered. There are two other prizes, one of \$50 and the other of \$25, offered by a committee in Italy. April first is the last date for all entries to be sent. Miss M. Ethel Thornton, secretary-treasurer, Canadian Federation of Business and Professional Women's Clubs, Newwood Grove P.O., via Winnipeg, Man.

Rules governing the competition are that models or designs must be submitted by the artist. Entries must have universal appeal, not emphasizing anything symbolic of a single country; they should be suitable for a personal badge for use in clubrooms. To avoid expense in reproduction, not many colors should be used, one or two on a background of silver or gold being sufficient.

Mass Ignorance

Need For More Control Over Human Nature

I heard Sir Joseph Stamp, at the British Association this year, make a strong appeal for the construction of as many as possible of the best scientific brains of the young generation away from the sciences of matter, physics and chemistry into the sciences of life, biology, psychology, and sociology. It was quite right, it is there that the danger-point lies now. We have got as much control as we need over lifeless nature; we have practically no control over human nature, and over the monsters we have unconsciously created, or at least allowed to grow up unchecked, in the steps of economic systems, materialist moralities, materialist sovereign states, mass ignorance and mass hysteria. Julian Huxley.

Woman Suffragette Dies

Leaves Valuable Estate To Benefactors

Relating to the "New Sex" The late Elizabeth Knight, one of the pioneers of the women's suffrage movement in Britain, and one of the first women doctors in England, left an estate of \$1,250,000 which was disclosed when the will was probated, and not a single man was among the beneficiaries.

Dr. Knight served prison terms twice for her suffrage activities, first in 1905 following a call she paid on the prime minister's residence at 10 Downing street, and again in 1914.

Extend Trade Treaty

Second Extension Is Arranged Between Canada And Germany

A second extension of the trade treaty between Canada and Germany has been arranged between Canada and Germany for the trade treaty initially contracted a year ago, according to an announcement made at Ottawa recently. On January 1 last year Germany agreed to exempt Canadian goods from the "Ochertarif," or surtax, rates that were applicable to the products of countries which had not then negotiated commercial treaties with the reich. This agreement terminated on March 31, 1933.

As from April 1, it was renewed with Canada, according to Germany the benefits of the intermediate tariff, in return for which that country granted to Canada the "conventional" or treaty tariff on such commodities as normally were excluded from the "conventional tariff" schedules. On other commodities Canada was granted the general tariff, with no application to any Canadian goods of the "Ochertarif" rates. This agreement will hold until Dec. 31, 1933.

Watches Over London Parks

Mystery Woman Is Known To The London Park Keepers As "The Watcher"

A mystery woman is known to the London park keepers as "The Watcher." Day after day she strolls into one or other of the 13 London County Council parks or open spaces, not loitering or reading, but always with an eye open for wrongdoers. She is a woman detective employed by the London County Council who watches over the safety of women and children.

The mystery of her identity and the secrecy of her movements help her greatly in her work. This mystery woman has a rota of parks to visit. Every day she is in a different place. If she sees any mischief she reports it to the park keeper, a watch is kept, evidence obtained, and the offender arrested.

Her role is only broken when she has to investigate complaints made from any particular park. She also inspects the gymnasiums in the parks, the swings and the children's playgrounds. Many mothers have cause to be thankful for her vigilance.

Had Narrow Escape

Cries for help, uttered as he was being drawn slowly towards the burning fire in the Toronto Terminal Hotel, company furnace, brought rescuers who saved William French, 38, from being burned to death. French, shovelling coal, was sucked into the self-feeding chute which directly into the roaring furnace.

The only thing civilization has learned to produce in sufficient quantity is male nukes.

One of the worst things of the world is the sympathy that goes with it.

Mountain View Notes

A successful five hundred drive was held on Saturday evening in Community Hall. Prizes were won by Mrs. J. Worrall. Ladies first, Mr. Kasepore Gents first. Consolation went to Mrs. W. Shultz and Mr. G. Clarke. Mrs. R. Oldham and Mrs. Garnet Tighe served refreshments. Next Saturday evening the club will meet again. The ladies take turns in serving lunch and the gents are charged a small fee to defray expenses for light and fuel.

Mrs. E. Barnes entertained a few friends at dinner on Sunday.

A gopher was observed by a resident of the Mona district on Monday. Is it or is it not a true sign of an early spring?

One lady reports an early hatch of chicks. We wish her luck with her extra early brood.

Westcott Notes.

Mrs. Ben Hunsperger celebrated her 92nd Birthday on Feb. 8th at the home of Mr. and Mrs. T. A. Murphy. She is in perfect health. A few friends were in to wish her many happy returns of the day.

Canadian Coarse Grains For Dairy Cattle

(Experimental Farms Note)

With the present low prices for milk and milk products, the dairy farmer has to rely to a very large extent upon home-grown grains for his dairy cattle. Fortunately, the three grains most commonly grown in Canada, oats, barley and wheat, are excellent for this purpose. Ground oats have always been recognized as a suitable feed for dairy cattle. They are nutritious, light and bulky, carrying considerable fibre it is true, but the dairy cow is admirably adapted to utilizing fibre. Oats are the richest in protein of any of our coarse grains and as such make an ideal base for a meal ration, of which they may form up forty-five per cent. Barley has not usually been considered a desirable dairy cow feed by Canadian feeders, largely because it has not been used for this purpose to any great extent. Barley is fairly high in protein, considerably lower than oats in fibre and rich in total digestible nutrients, so that it goes well with oats and may form up to thirty per cent of the ration. It is particularly useful in the ration in keeping heavy milking cows in flesh. Our Danish competitors regard a combination of oats and barley as one of the best mixtures for dairy cattle.

In the past, corn has been used to some extent in the ration for dairy cattle. Where Canadian grain corn can be obtained, it may still be used to replace barley or even part of the oats. Canadian grown barley, however, is a very effective substitute for imported corn and may replace the latter under almost any conditions of dairy cattle feeding.

Wheat may be considered practically equal to barley or corn but is usually too high in price except when low or damaged grades are available, under which conditions it may be used to augment the meal ration or to replace barley up to twenty per cent of the mixture. The lower grades of any of the coarse grains make economical feeds for dairy cattle.

Various combinations of the coarse grains, crushed or ground, may form from seventy to one hundred per cent of the grain mixture. With cows milking very heavily, however, it is advisable to supplement the coarse grains with some protein rich feeds such as oil cake meal, soy bean meal, gluten feed, distillers' grains, brewers' grains, etc. The percentage of these protein supplements that it will be necessary and profitable to use will depend upon the amount of milk being produced per cow per day, the price being received for the milk, and the nature of the roughage being fed. If alfalfa or good clover hay is available, comparatively little other protein supplement is required.

Geo. W. Muir,
Dominion Animal Husbandman

LOCAL & GENERAL

Messrs. C.H. Adshead and J.V. Bensch went to Edmonton on the special train on Monday morning to attend the retail merchants convention held in that city this week.

Mr. N.S. Clarke is attending the Dairy Convention being held in Edmonton this week.

When returning from Turner Valley on Saturday morning with a load of gas, Fred Folkman and Henry Walters had the misfortune to overturn their truck. In order to avoid colliding with a car, they swerved and went into the ditch, the truck rolling over twice. Fortunately both men escaped with only superficial damages.

The sermon subject at the Evangelical Church service at the M.B.C. Church next Sunday morning will be "Our Preparation and Commission for Christian Service."

Sunday, February the 25th is Carlers' Sunday at Knox United Church. All carlers kindly note.

Several tons of U.F.A. salt for sale at Pool Elevator or on the farm of W.J. Scheidt.

Mrs. Reiffenstein and Mrs. W.W. Gillrie were led Deer visitors last week.

Mrs. W.J. Bilyard is visiting her sister at Edmonton this week.

Mrs. W.J. McCon and Mrs. E.G. Ranton are in Edmonton this week visiting relatives.

Mr. W. Moon, has just completed drilling a well for the Club Ranch. He had to go 170 feet to reach good water of which there is now a plentiful supply.

The annual Young People's Service will be held in Knox United Church on Sunday next, Feb. 18th at 7:30 p.m. Members of the Y.P.s. will be in the service, and Rev. R.W. Hiltbert, of Calgary, will preach. A cordial invitation to be present is extended to all.

The boys of the Trail Ranger Group take this opportunity of thanking the mothers for their help, the people of Didsbury for their patronage, the Didsbury Pioneer and the management of the picture show, for their announcements, thus helping to make our tea a success.

Keep Wednesday evening, Feb. 21 open for the High School play which will be given under the auspices of the I.O.D.E. at the Opera House. "The Importance of Being Earnest" is a comedy that has proved very popular amongst amateur entertainers on both sides the Atlantic for several years. You'll enjoy it. (62)

During the season of Lent, which begins Ash Wednesday February 14th, and ends with Easter Sunday, Special midweek English Lenten services will be held in St. John's Ev. Lutheran Church, Didsbury, every Thursday evening at 8 p.m., beginning with February 15th. In these services special emphasis will be laid upon the Passion Story of Jesus Christ.

Melvin Notes

Miss Dorothy Miller spent the week with Mrs. August Krebs.

Mr. and Mrs. Carlson visited with Mr. and Mrs. DuPont on Sunday.

Miss Lilian Kynel spent last week with Mrs. August Krebs.

Mrs. Gene Webster and Lorna spent last week with Mrs. C. Young.

Mr. and Mrs. Peter Johnston visited Mr. and Mrs. R. MacFarlane on Monday.

Miss Ruth Johnston of the Didsbury Hospital staff spent the week end with her parents Mr. and Mrs. Peter Johnston.

Mr. and Mrs. Harold Bliss of Bowden spent Sunday with Mr. and Mrs. Aug. Krebs. Mrs. Bliss is spending the week with her parents.

Mrs. Emil Krebs and Alvin spent the week with Mrs. Henry Fischer.

The Go-Gitters Club are running a contest for the purpose of increasing membership and raising funds. Two sides, the Reds and Blues, have been chosen and each side will provide entertainments &c, until the close of the club season. The losing side will entertain the winners to a picnic during the summer.
